

Good morning,

My name is Dr. Hannah Oldham and I am writing to give my highest recommendation for Colton Clearman as he begins his college recruitment journey. I was Colton's math teacher for Algebra where he received an A and I promoted him into Honors math for every year since. He is extremely respectful and goal oriented. He is the epitome of what you want to see out of a student athlete. He is committed to his studies with a 3.781 GPA and is focused on his goal of playing high level baseball. In addition to his honors classes he also takes weight training every semester to make sure he is always conditioning even in the off season. As a former volleyball coach myself, I see all the qualities I would want out of a recruitment of a high school athlete. Please let me know if you have any additional questions.
